JOB DESCRIPTION
STRUCTURAL STEEL FITTER

Position Summary:
The Structural Steel Fitter is responsible for assembling, fitting, and installing structural steel components in accordance with project specifications, blueprints, and safety standards. This role desires precision, knowledge of welding and rigging techniques, and the ability to work collaboratively in a construction or fabrication environment.

Key Responsibilities:
- Read and interpret blueprints, drawings, and specifications for structural steel assemblies.
- Fit, assemble, and install structural steel components, including beams, columns, and other steel structures.
- Work closely with welders, riggers, and other team members to ensure proper assembly.
- Follow all safety regulations and maintain a clean, organized work environment.
- Use hoisting, rigging, and lifting equipment safely and efficiently.
- Collaborate with project supervisors to resolve fitting or alignment issues.
- Report any defects, deviations, or safety hazards promptly.

Qualifications:
- Experience as a structural steel fitter or similar role in the construction/fabrication industry.
- Ability to read and interpret blueprints, drawings, and technical specifications.
- Knowledge of hand tools, power tools, and fitting equipment.
- Basic welding knowledge is an advantage.
- Strong attention to detail and precision in measurements and fitting.
- Ability to work at heights and in various weather conditions.
- Physical stamina and ability to lift heavy steel components.
- Strong teamwork and communication skills.
- Must be punctual and possess a strong work ethic.
- Must be willing to work overtime and weekends as necessary.
- Must be willing to submit to a drug screen.

Work Environment
- Fabrication shop environment with exposure to noise, heat, and heavy equipment.
- Requires use of PPE and adherence to company safety guidelines.
- Requires standing, lifting, and moving steel components regularly.
- May involve overtime, weekend work, or project-specific schedules.
